

	PSYCHOLOGY	
	Qualification Level	A-level
	Exam Board/ Syllabus	AQA
	Contact(s)	Mrs Cameron-Wyatt, Miss Z Luddington

Why Study This Course?

What makes people behave the way they do? Studying psychology can help students to gain a better understanding of themselves and the people around them, better communication skills, and analytical thinking skills. Within the subject we cover a range of different topics including memory, stress, conformity, obedience, sleep, relationships and abnormality. Students are also given the chance to look at research methods, design and conduct their own research. Students will be expected to have a good understanding of mathematics and science to enable them to interpret data, use statistical tests and identify trends. As a result, psychology is able to give students a deeper understanding of the world around them and develop their analysis and evaluation skills.

Course Content

Year 1: you will study six core topics of work designed to give you a broad overview of the main approaches to understanding human behaviour. The topics covered:

- Social influence
